

FIXED MOUNTING BRACKETS **orbit** Orbit Industries, Inc.

NEW!

Orbit's **NEW** Take On **An Old Favorite**

Orbit's updated Fixed Mounting Brackets (FMB Series) introduce new features to a legacy product. The FMB Series now allows for mud rings to mount vertically & horizontally. In addition, box latches temporarily hold boxes in place on the bracket without needing to tighten box screws, saving time for ring or cover installation.

- Compatible with 4", 4-11/16" and 5" square boxes
- Unique key-hole patterns allow boxes to be turned 90°
- Compatible w/ Standard & Adj. Rings mounted vertically or horizontally
- Use 4" rings on any size box. Can be mounted on their own for low voltage applications using 8/32 screws.
- Bendable box latch tabs temporarily hold 4" or 4-11/16" sq. boxes in place without needing to tighten box screws until final ring or cover installation.

WHAT ELSE IS NEW?

Orbit's NEW Box Mounting Adapter (BMA-26) mounts 4" & 4-11/16" sq. boxes directly to stud and features up to 6" back support. The tool-less 6" back support eliminates the need to stock or handle different brackets for different stud depths.

- Compatible with 4" & 4-11/16" square boxes
- Back support range from 2-1/2" to 6"
- Compatible w/ Standard & Adj. Rings mounted vertically or horizontally
- Unique key-hole patterns allow boxes to be turned 90°
- Bendable box latch tabs temporarily hold 4" or 4-11/16" sq. boxes in place without needing to tighten box screws until final ring or cover installation.
