

Malleable Iron

Malleable Iron Fittings are manufactured from a hot liquid metal poured into a mold, then cooled to produce a casting that is extremely tough. Malleable Iron Fittings are also coated with zinc plating for corrosion protection. Able to withstand hammering, machining, and extreme temperatures without breaking, Malleable Iron Fittings are often required by designers and federal specs for industrial applications.

Electrical Fittings

Bronze

Bronze Fittings are composed of a copper-tin alloy that is both highly conductive and corrosion resistant. Bronze is regarded as the “go-to material” for grounding electrical service panels and equipment, especially for direct-burial (DB).
