

Universal Strut Clamps | Pg. D7

Universal Strut Clamps can be inserted anywhere along slotted channel, and allow for remarkably tight spacing between conduits. 1/2" thru 2" is a single piece break-apart design without nut. 2-1/2" thru 4" is a two-piece design with nut and thicker wall.

Electrical Fittings

Saddle-Type Strut Clamps | Pg. D7

Saddle-Type Strut Clamps can be used to secure EMT, Rigid conduit, and FMC Conduit in 5/16" thru 4" trade sizes. No need to break-apart or reassemble thanks to its single-piece design.

Wide saddle and anti-rotation tabs prevent twisting when tightening screw. Universal bolt head stays captive so there are no loose screws to drop.

Double-Bite Set Screw Combo Couplings | Pg. D8

Tubular Steel Double-Bite Set Screw Combo Couplings feature a saddle-type clamp that rides up and down the screw, and grips flexible conduit better than squeeze-type combo couplings. This double-bite saddle clamp joins all common Flex, MC, and AC-type cable ranges to one end of the fitting. On the opposite end, a set screw joins 1/2" and 3/4" EMT conduit to create a seamless conduit transition. For dry locations only.
