

**Catalog#: EMT TO EMT PULL ELBOWS SET-SCREW TYPE WITH GASKET
 EMT TO EMT PULL ELBOWS SET-SCREW TYPE WITH GASKET**

Category PIPE FITTING
Page [D10](#)

Description:

Orbit Industries' set-screw EMT to EMT pull elbows are used when 90° turns are needed in conduits and when wires must be pulled through elbows before making the turn. The set-screw pull elbows are protected from dirt, dust and moisture by a gasket and cover and they are ready to use immediately. This removable gasket and cover allow for wires to be pulled and fed back into pipes at a 90° angle or turn.

Features:

- Zinc Die Cast
- Aluminum Cover
- With Gasket

Certifications:

UL File Number:
