

Catalog#: FLEX BUSHING
FLEX BUSHING

Category PIPE FITTING
Page [D12](#)

Description:

Orbit Industries' screw in bushings are used to insulate the sharp cut edge of flexible metal conduit so wires passing through the raceway will not be damaged. The screw in bushings allow trouble free installation of low voltage fire alarm, security and data cables in flexible metal conduits. Cables exit the raceway without damage from sharp edges when termination of the devices is required in the field. The bushings are also of excellent corrosion protection with zinc electroplated.

Features:

- Steel
- Electroplated Zinc
- Used to insulate Cut Flex When the conduit is used for data cables without a junction box
