 RIGID TO BOX PULL ELBOWS WITH GASKET**

Category PIPE FITTING
Page [D36](#)

Description:

Orbit Industries' pull elbows are used to bond threaded rigid conduits to boxes to form 90° turns in conduit running to electrical junction boxes or enclosures. Orbit Industries' pull elbows come standard with a gasket and screw cover that is removable to aid in wire pulling through the fittings.

Features:

- Zinc Die Cast
- Aluminum Cover

Certifications:

UL File Number:
