

**Catalog#: LOW VOLTAGE WALL MOUNTING PLATES  
 1-GANG AND 2-GANG LOW VOLTAGE WALL MOUNTING PLATES WITH  
 SCREWS FOR OLD WORK APPLICATIONS**

**Category** SWITCH BOX  
**Page** [E38](#)

**Description:**

Orbit Industries' Low Voltage Wall Mounting Plates eliminate the need for an electrical box where low voltage Class 2 circuits are used. Available in 1 and 2-Gang models, the LVWPs are used for Old Work applications and can be installed with just a drywall saw and screwdriver. After a rectangular cut is made onto the wall, simply bend the tabs inward behind the wall then, using the included screws, screw onto the drywall through the plate's slotted holes for a clean finish.

**Features:**

- Used for Old Work applications
- Can be used with drywall, plaster or tile openings
- Eliminates the need of an electrical box for low voltage Class 2 wiring
- Just drywall saw and screwdriver needed for installation
- Fits 1/2" to 1-1/4" drywall thickness

**Specifications:**

Material Steel

**Certifications:**
