

CEILING HANGING ADJUSTABLE BRACKETS

CEILING HANGING ADJUSTABLE BRACKETS

PRODUCT FEATURES

- ▶ Supports NEMA enclosures, junction boxes, disconnects, J-hooks, and more from concrete or corrugated decks
- ▶ Telescoping bar adjusts to fit various ceiling spans; available in 36" and 60" lengths
- ▶ Supports up to 100 lbs. with a TEK screw that drives through the front and locks into the rear adjustable bracket via a pre-drilled hole
- ▶ Secure the CHAB to the mounting surface with two bolts, fastening through the anchor holes positioned on the horizontal top area of the CHAB
- ▶ Integrated center stopper prevents the extension from separating during assembly
- ▶ No welding, cutting, or bending required—eliminate manual work, reduce time and safety risks
- ▶ Includes 1/4" clip for optional mounting of pitchforks, MC cable, conduit, or bat wings (CC-Series)
- ▶ Constructed from heavy-duty 12-gauge steel with a corrosion-resistant zinc finish
- ▶ Supports power, low-voltage, cables, fire life safety systems and more

NOTES

Weight Rating Disclaimer: Load capacity is dependent on fastener type and installation conditions. When using TEK screws, verify allowable loads per the screw manufacturer's specifications.
